EDUCATION

BS Computer Engineering — COMSATS University Islamabad, Lahore Campus Sep 2023 – Jun 2027

Relevant Coursework: VLSI Design, Digital System Design, Data Communication & Networks, Artificial Intelligence

Intermediate (ICS) — Grade A — Punjab Group of Colleges 2021 – 2023

EXPERIENCE

Intern Web Developer — MKY Global Forwarding (Remote) Mar – Jul 2025

- Deployed a full logistics website for a startup, improving operational efficiency across key workflows.
- Collaborated with a development team on real-world projects using HTML, CSS, JavaScript, and SQL.

C++ Developer Intern — Rhombix Technologies (Remote) Jan – Mar 2025

- Built efficient, scalable C++ applications focused on Data Structures, Algorithms, and OOP principles.
- Delivered a feature-complete To-Do List manager and an Encryption Tool (Caesar cipher).

PROJECTS

AEGIS Swarm — Multi-Agent AI System 2026

Python · HuggingFace Spaces · Fine-tuned LLM · Vision-Language Model

- Designed an autonomous multi-agent swarm for executing complex tasks with collaborative agent communication layers.
- Fine-tuned a dedicated AEGIS-SWARM LLM and a multimodal Visual Agent for agentic coordination; both deployed on HuggingFace (Wall06).

8×8 Sparsity-Aware Systolic Array — CEP Research Project 2026

VHDL · Verilog · RTL Simulation · Hardware Design

- Behavioural RTL simulation of an 8×8 sparsity-aware systolic array for efficient neural network matrix inference.
- Dynamic power gating detects zero-valued elements in real time, gating clock/power domains to reduce energy consumption.

Fake News Detector — Hackathon Winner 2025

Python · NLP · Text Classification · Gradio

- AI-driven misinformation detection tool built during a hackathon; uses NLP classification to flag fake news in real time.

FlumenIntel App & News Analyzer App 2025

Python · Gradio · Groq · NewsAPI · HuggingFace Spaces · SQLite

- FlumenIntel: real-time data intelligence app with ML-powered visualisation, deployed on HuggingFace Spaces.
- News Analyzer: AI news app featuring sentiment analysis, LLM reasoning, and credibility scoring with persistent article history.

CERTIFICATIONS

- Generative AI for Everyone — DeepLearning.AI / Coursera (2025)
- Create Generative AI Apps on Google Cloud — Google Cloud Skills Boost (2025)
- Generative AI Certification — Pak Angels (2025)
- Programming for Everybody & Python Data Structures — University of Michigan / Coursera (2025)
- Google Cloud Challenge Completion Badge — Qwiklabs (2026)

- DataCamp Track: SQL (Intro → Intermediate → Joining Data), Python for Developers, APIs in Python, Importing Data, Data Engineering, Cloud Computing (2026)

VOLUNTEERING & LEADERSHIP

Microsoft Learn Student Ambassador (MLSA) — COMSATS Lahore Feb 2025 – June 2025

- Member & Co-Strategist: led technical workshops on AI and cloud, coordinated knowledge-sharing initiatives across campus.

IEEE COMSATS Lahore Feb 2025 – Sep 2025

- Active member contributing to engineering society events, technical workshops, and student outreach programmes.

Youthe COMSATS Lahore Feb 2025 – Present

- Engaged in student-led development events and community service initiatives.

SKILLS

Languages: Python, C++, Java, JavaScript / TypeScript, SQL, HTML/CSS

AI & ML: LLMs, Generative AI, YOLOv8, TensorFlow / TFLite, HuggingFace, Gradio, RAG, pgvector, Claude API

Hardware: Verilog, VHDL, FPGA (Xilinx Vivado), GNU Radio, RTL-SDR, VLSI Design, Proteus, PCB Design

Web & Cloud: Next.js, FastAPI, Supabase, Redis, Vercel, Railway, Google Cloud, Fly.io

Tools: Git / GitHub, Cisco Packet Tracer, MATLAB, AutoCAD, Figma, Cursor

Soft Skills: Technical leadership, problem-solving, teamwork, public speaking / workshops
